**MESSAGE:**

Effective April 1, 2015, Alberta and the Government of Canada have agreed upon a new set of enhanced performance indicators for the Labour Market Agreement for Persons with Disabilities (LMAPD). These indicators will be used to capture pre and post intervention information as well as provide information on employment outcomes obtained by individuals funded through the LMAPD.

In order to accurately report on these new performance indicators, Human Services requires a means of identifying LMAPD eligible individuals in Mobius. When an Albertan self-declares that they have a disability, this information must be captured in Mobius under the following data fields:

1. The "Special Interest" drop-down indicator located on the client registration home page within Mobius. The "Disability" option must be selected for clients who have self-identified as having a disability.
2. The check box entitled "Does the person have a physical, mental, cognitive or sensory disability that is a barrier to education or employment" within the Disability Factors section of the Employability Assessment must be used when conducting an Employability Assessment with an Albertan who has self-identified as having a disability.

In order to ensure that Alberta is able to meet its reporting obligations under the LMAPD it is essential that the above information be completed in Mobius for all clients that self-identify as having a disability. This information will be instrumental in supporting Alberta's ability to provide programs and services that assist persons with disabilities obtain and maintain employment now and in the future.
